Scholarship Application Cover Letter Sample

Department of Computer Science
Edu-Tech University College of Alberta
Drytown, CA 98555

March 4th, 2014

Ms. Patricia Fischer
Dean of Students
Student Affairs Department
Edu-Tech University
Drytown, CA 98555

RE: Scholarship Application

Dear Ms. Fischer:

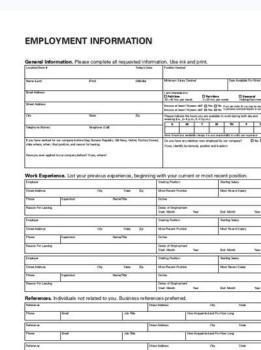

I am writing to submit my application for a scholarship from Edu-Tech University's Financial Aid Program for the fall semester 2014. Presently, I am a first year student in the Master of Computer Science program.

Attached is a copy of my first semester's results for your approval. I am also attaching a copy of my high school grades to verify my diligence in my studies.

I am currently dealing with some financial difficulties, and am unable to pay my fees for the fall semester. I have designs to obtain a part-time position in order to finance my studies, but it will likely not be enough to cover the whole tuition and accommodation fee in addition to my normal living expenses. Based on my financial situation, I am requesting a student scholarship so that I would be able to carry on with my studies while I work to better my circumstances.

Thank you for your consideration. If you require any further information regarding my application, you may contact me anytime at (555) 555-0149. I will contact your secretary to follow up with you in the coming week.

Sincerely,
(Signature)
Derrick Judge

JAN M. VOLUNTEER

555 North 5th Street Make Believe, WI 55555

Cell Phone: 555-555-5555 email: jmvolunteer@gmail.com

KEY QUALIFICATIONS

Service-driven Forestry and Wildlife Ecology major with Environmental Studies & African Studies minor. Previous French and Spanish language experience. Certified wilderness leader

Education

XYZ University Bachelor of Science
Forestry and Wildlife Ecology major, Environmental Studies and African Studies minor

- Expected graduation date: May 2015
- GPA: 3.35/24.00
- Dean's list: 3 semesters

Environment Experience

Environmental Agency Make Believe, WI
Advocacy Intern

- Completed full time summer internship
- Managed fundraising campaigns, completed over 100 cold calls, and assisted in event planning

Natural Resources Department Somewhere, WI
Researcher

- Spent a week in the Galapagos Islands researching rainforest preservation
- Presented on findings to science majors for a 2 hour presentation
- Helped tag giant tortoises in Galapagos National Park
- Gathered research samples from one of the most biodiverse countries in the world

Forest Service Make Believe, WI
Volunteer Fire Fighter

- Interned full time with Wisconsin Forest Service for over 450 hours of forest experience
- Cut trails along woods and spent most of the summer battling forest fires during the dry season
- Educated users on wilderness area management and regulations of their use
- Conducted overnight patrols and documented any unusual or suspicious findings

Outside Your Door Somewhere, WI
Trip Leader

- Completed two week training totaling 80 hours of wilderness training
- Lead 12 at-risk youth on backpacking trips around Wisconsin
- Facilitated group bonding activities and nature workshops for students
- Created debrief discussions after long work projects and hikes for youth groups

High Hopes Somewhere, WI
Ropes Course Leader

- Planned curriculum around team building for different youth groups
- Adhered to strict safety and security policies of the course
- Taught youth how to tie their own knots, how to communicate with each other, and rock climb safely

Sample html code for application form.

Select Box Control A select box, also called drop down box which provides option to list down various options in the form of drop down list, from where a user can select one or more options. Password input controls – This is also a single-line text input but it masks the character as soon as a user enters it. Note: This form cannot be edited with form builder. When a user will click next page then the value of hidden control will be sent to the web server and there it will decide which page will be displayed next based on the passed current page. Example Here is example HTML code to show the usage of hidden control – File Upload Box This is page 10 This will produce the following result –

Example Here is a basic example of a multi-line text input used to take item description – Multiple-Line Input Control Description :

Enter description here... They are created using HTML tag. 3 cols Indicates the number of columns of text area box Checkbox Control Checkboxes are used when more than one option is required to be selected. For example, during user registration you would like to collect information such as name, email address, credit card, etc. 2 accept Specifies the types of files that the server accepts. A form will take input from the site visitor and then will post it to a back-end application such as CGI, ASP Script or PHP script etc. 3 value The value that will be used if the checkbox is selected. 3 button This creates a button that is used to trigger a client-side script when the user clicks that button. Sr.No Attribute & Description 1 type Indicates the type of input control and for checkbox input control it will be set to radio. This will produce the following result – Attributes Following is the list of attributes for tag. It takes values like _blank, _self, _parent etc. Following is the list of important attributes of tag – Sr.No Attribute & Description 1 value No. 4 size Allows to specify the width of the text-input control in terms of characters. Sr.No Attribute & Description 1 name Used to give a name to the control which is sent to the server to be recognized and get the value. Example Here is example HTML code for a form with one drop down box Select Box Control Maths Physics This will produce the following result – Attributes Following is the list of important attributes of tag – Sr.No Attribute & Description 1 name Used to give a name to the control which is sent to the server to be recognized and get the value. They are also created using HTML tag but type attribute is set to radio. This is also created using the element but type attribute is set to file. 2 name Used to give a name to the control which is sent to the server to be recognized and get the value. Simply follow the instructions below to apply the simple employment application form to site. Change my@email.com (see at the end of the code) to your email address where the form should be sent. 4 enctype You can use the enctype attribute to specify how the browser encodes the data before it sends it to the server. The most frequently used are GET and POST methods. Multiple-Line Text Input Controls This is used when the user is required to give details that may be longer than a single sentence. The type attribute can take the following values – Sr.No Type & Description 1 submit This creates a button that automatically submits a form. 3 label An alternative way of labeling options File Upload Box If you want to allow a user to upload a file to your web site, you will need to use a file upload box, also known as a file select box. The HTML tag is used to create HTML form and it has following syntax – form elements like input, textarea etc. This control hides inside the code and does not appear on the actual page. 3 value The value that will be used if the radio box is selected. Example Here is example HTML code for a form with one file upload box – File Upload Box This will produce the following result – Attributes Following is the list of important attributes of file upload box – Sr.No Attribute & Description 1 name Used to give a name to the control which is sent to the server to be recognized and get the value. Multi-line text input controls – This is used when the user is required to give details that may be longer than a single sentence. 2 rows Indicates the number of rows of text area box. Example Here is a basic example of a single-line text input used to take first name and last name – Text Input Control First name:

Last name: This will produce the following result – Attributes Following is the list of attributes for tag for creating text field. There are various form elements available like text fields, textarea fields, drop-down menus, radio buttons, checkboxes, etc. Sr.No Attribute & Description 1 type Indicates the type of input control and for text input control it will be set to text. Radio Button Control Radio buttons are used when out of many options, just one option is required to be selected. Possible values are – application/x-www-form-urlencoded – This is the standard method most forms use in simple scenarios. A job application web form allows you to easily open a door to new applicants. 2. 2 reset This creates a button that automatically resets form controls to their initial values. They are also created using HTML tag. 2 selected Specifies that this option should be the initially selected value when the page loads. Single-line text input controls This control is used for items that require only one line of user input, such as search boxes or names. Sr.No Attribute & Description 1 type Indicates the type of input control and for checkbox input control it will be set to checkbox.. Multi-line input controls are created using HTML tag. They are also created using HTML tag but type attribute is set to checkbox.. The back-end application will perform required processing on the passed data based on defined business logic inside the application. 4 checked Set to checked if you want to select it by default. 3 value This can be used to provide an initial value inside the control. Sr.No Attribute & Description 1 type Indicates the type of input control and for password input control it will be set to password. Copy this code and paste it to your page. Example Here is example HTML code for a form with two checkboxes – Checkbox Control Maths Physics This will produce the following result – Attributes Following is the list of attributes for tag. You can also create a clickable button using tag by setting its type attribute to button. Button Controls There are various ways in HTML to create clickable buttons. 5 maxlen Length Allows to specify the maximum number of characters a user can enter into the text box. Example Here is example HTML code for a form with three types of buttons – File Upload Box This will produce the following result – Hidden Form Controls Hidden form controls are used to hide data inside the page which later on can be pushed to the server. 3 multiple If set to "multiple" then allows a user to select multiple items from the menu. Example Here is a basic example of a single-line password input used to take user password – Password Input Control User Id :

Password: This will produce the following result – Attributes Following is the list of attributes for tag for creating password field. Copy HTML code for the form Policy / Copyright © 1998-2022 GO WEB DIRECT GROUP LTD, 4 image This creates a clickable button but we can use an image as background of the button. Password input controls This is also a single-line text input but it masks the character as soon as a user enters it. HTML Form Controls There are different types of form controls that you can use to collect data using HTML form – Text Input Controls Checkboxes Controls Radio Box Controls Select Box Controls File Select Boxes Hidden Controls Clickable Buttons Submit and Reset Button Text Input Controls There are three types of text input used on forms – Single-line text input controls – This control is used for items that require only one line of user input, such as search boxes or names. 2 method Method to be used to upload data. This way, you get as many candidates as possible to choose from. Example Here is example HTML code for a form with two radio buttons – Radio Box Control Maths Physics This will produce the following result – Attributes Following is the list of attributes for radio button. 3 target Specify the target window or frame where the result of the script will be displayed. 1. Form Attributes Apart from common attributes, following is a list of the most frequently used form attributes – Sr.No Attribute & Description 1 action Backend script ready to process your passed data. For example, following hidden form is being used to keep current page number. multipart/form-data – This is used when you want to upload binary data in the form of files like image, word file etc. 1 0 0 F O R M S - Online responsive HTML forms for your site Home Ready forms How to Pro forms Form builder Articles Contact us Employment Application form example Making it easy for potential new employees to send you their resume, curriculum vitae or job application is important. 2 size This can be used to present a scrolling list box.
