We export the insertion of the PCBN to world countries such as USA, Germany, UK, Italy, France, Turkey, Russia, Saudi Arabia, United Arab Emirates, Ukraine, Israel, Canada, South Africa, South Korea, Japan, Australia, New Zealand, Finland, Sweden, Norway, Denmark, Switzerland, Poland, Czech, Ireland, Holand, Belgium, Greece, Croatia, Spain, Portugal, Egypt, India, Philippines, Cambodia, Thailand, Malaysia, Singapore, Singapore, Indonesia, Mexico, Brazil, Colombia, Chile, Argentina etc. Excel is a spreadsheet software included in the microsoft office suite. It is widely used to create grids of numbers and formulas that specify calculations, inventory tracking and accounting, and more. However, it has some limitations like lack of security, and controlling different versions of the same file is also very difficult. Here is a curated list of Top tools that are able to replace Microsoft Office Excel. The list contains open source (free) and commercial (paid) software. Best alternative to excel: Open source (free) and paid name ClickUp Zoho Sheet Features ✓ you can sync with Google Calendar. ✓ helps you collaborate with others. ✓ This software helps you collect your data with forms. ✓ Supports more than 23 different languages. Price From \$5\mo. Free Review\Rating 4.9 4.7 Link Visit the website Visit site 1) ClickUp ClickUp is a software that allows you to manage your task, docs, chat, goal and more with ease. This app allows you to assign and resolve comments for tasks. Helps you set job priorities without stores. Features: Allows you to easily filter and search for the desired task. Allows you to assign multiple tasks with just one click of the mouse. You can sync with Google Calendar. Helps you collaborate with others. ClickUp lets you sort tasks by project. Offers a freemium plan for basic services. Provides a customer-centric approach. It offers a highly efficient dashboard view. Good customer support. The reporting resources aren't that good. It is not an ideal project management tool for individuals. Prices: Two pricing plans. 1) Free plan, 2) Unlimited plan for \$5 per month. Why should you choose Clickup? Clickup is the most versatile tool on the market with a plan forever free. It has an excellent user interface with a powerful core in which you can easily integrate other tools. For example, integrating Spreadsheet, Email, Events, Chat and more, all in one app! 2) Zoho Sheet Zoho Sheet is a spreadsheet application for collaborative teams. It supports more than 350 functions that help you perform complex and basic calculations without any problem. Features: You can write macros from a task or use Visual Basic for Applications (VBA) code to perform the action with a click of a button. Automatically detects and removes data related to anomalies. You can highlight parts of the data with conditional formats. It allows you to export sheets in various file formats, including .pdf and .html. You can publish a spreadsheet and decide who can see formula cells. This software helps you collect your data with forms. Supports more than 23 different languages. 3) Google Spreadsheet is a popular cloud-based app that lets you create, update, delete, and share data online. This Ajax-based application is compatible with the CSV file (values separated by commulators). Features: It has built-in formulas, a range of conditional formatting options, and pivot tables. This free spreadsheet software app allows you to access phone or computer spreadsheets. It has exploration panel, which provides an overview of the data and generates pre-populated charts. Everyone can work on the same worksheet. It automatically saves changes. Link: <https://www.google.com/sheets/about/> 4) WPS Office Spreadsheets Office Sheets WPS Office Sheets is a powerful tool that contains hundreds of commonly used functions and formulas. This software can be run on Microsoft Windows, Linux, iOS, macOS and Android platforms. Features: Includes a built-in table and cell styles. This tool provides customizable graphics including row, scatter, column, pie, bar and more. It supports advanced pivot tables, allowing you to analyze and summarize data. You can predict and find solutions to complex problems using what-yourself analysis. WPS Office Sheets allows you to open and edit multiple documents. It has more than 50 keyboard shortcuts. Support comments of track changes. 5) Monday is one that allows you to analyze your performance and manage your team in one place. It provides flexible panel for easy data visualization. You can collaborate with others. You can automate your daily work. Integration with Mailchimp, Google Calendar, Gmail and more. You can track your progress at work. It allows you to work remotely. 6) Airtable Airtable is a spreadsheet solution for companies and companies of all sizes. It is one of the best alternatives for that offers organization and collaboration capabilities in effective, mobile-friendly desktop solutions. Resources: Allows you to organize projects, content and ideas in a centralized system. This software supports form management. It helps you filter, sort, and reorganize data. It offers customizable views and fields. Link: <https://airtable.com/invite/vr/vphva8Bgs> 7) OpenOffice OpenOffice Calc is a tool that helps you calculate, analyze and present your data in reports. It helps you export spreadsheet directly as PDF files. Features: Offers cell formatting options for templates, borders, backgrounds, and more. You can calculate the cell value based on the restriction given in other cells. This tool has a scenario manager that allows you to perform the analysis of what-if data at the touch of a button. You can save spreadsheets in xml-based format. Apache OpenOffice calc supports multiple users. You can use a portable document format (.pdf) to send the output to others. Link: <https://www.openoffice.org/product/calc.html> 8) LibreOffice LibreOffice Calc is an easy-to-use open source software product. It helps you calculate, analyze, and manage data. It has numerous statistical and banking functions to create formulas and perform complex calculations on data. Features: You can organize, filter and store data. LibreOffice allows you to show or hide certain data tracks. This free excel program alternative provides dynamic charts that automatically update changed data. Provides real-time data sheets that can be integrated into spreadsheets and reports. You can perform collaborative work on spreadsheets. This software has a dynamic feature of building a chart that automatically updates when the data changes. You can drag and drop tables from any database to sheet. Link: <https://www.libreoffice.org/> 9) Numbers can create a beautiful spreadsheet that includes tables and images. You can collaborate with your team on PC, iPhone, iPad, or Mac. Features: It provides ready-to-use templates. Numbers support numerous functions. This Excel alternative allows you to summarize your tables. This tool has a library of over 700 customizable shapes. You can draw a diagram and add notes to visualize your data. It lets you work with your team in real time on spreadsheets stored in the Box or iCloud. Link: <https://www.apple.com/numbers/> 10) Sheetgo Sheetgo is a cloud-based software that allows you to manage the workflow of spreadsheets. It allows you to create, edit, delete, and update connections within google sheet files. Features: You can save your dynamic data. Sheetgo connects and filters colored data between worksheets. This Excel software alternative allows you to bring data from more than one sheet in a single master sheet. You can combine data from many tabular formats. This app helps you filter data during data transfer between sheets. Link: <https://www.sheetgo.com/> 11) Thinkfree Thinkfree is an application that allows you to edit and view spreadsheets. This tool helps you enter and calculate data or format cells. Features: Allows you to draw an object on the scribble pad and insert it into the sheet. You can change the cell phone formatting as number format, indentation, text wrapping, and borders. You can fill the empty cells with the values. It provides functions to find the reference value or location of a given cell. Link: <https://v9vwww.thinkfree.com/download/> 12) PlanMaker PlanMaker is spreadsheet software that is available on Microsoft Windows, Windows Mobile, and Linux. This free Excel alternative has numerous design features that allow you to create presentation quality spreadsheets. Features: You can swap worksheets between any version of PlanMaker. This Excel alternative software has 430 calculation functions. You can select and format more than one worksheet simultaneously. Provides intelligent padding of cellular areas with value lines. You can create an attractive worksheet using headers, footers, and borders. PlanMaker contains more than 430 calculation functions. You can fill the drawing with images, gradients, colors, and patterns. This software allows you to insert more than 80 varieties of graphics. Link: <https://www.freeoffice.com/en/features/freeoffice-planmaker> 13) TreeGrid SpreadSheet TreeGrid SpreadSheet is a tool that offers a cell-based AJAX grid. It has many predefined and custom formula functions. This software helps you manipulate individual selected cell groups or cells. Features: Supports Google Chrome, Mozilla Firefox, Opera, iOS Android mobile. This app provides localized formulas. It automatically adds rows and columns to the parchment. This tool provides a fully customizable cell popup menu. It has advanced JavaScript API to control the grid. The TreeGrid SpreadSheet can be located in any language, including texts, date and number format. This tool provides formal editable references with references a specific sheet. Link: <http://www.treegrid.com/Sheet14> SSuite Excel Professional SSuite Excel Professional is spreadsheet software that helps you calculate, analyze, summarize your important data in charts or reports. Features: It provides charts to select from 8 categories of 2D and 3D charts. You can recognize worksheets to show or hide specific data tracks or to format tracks according to conditions. It automatically updates the dynamic data displayed in the chart. This tool has a scenario manager that allows you to accomplish what is analyzing data at the touch of a button. Link: <https://www.ssuiteoffice.com/freedownloads.htm> 15) Azquo Azquo is a spreadsheet program that allows you to provide auditable and verifiable data in spreadsheets. It's built for an analyst that means you can manage data without requiring specialized IT skills. Features: Azquo says who changed the data, what, when as well as where. Allows you to import data from internal or external sources. You can control your data, users, and permissions from one place. It allows you to work online and offline. This tool has a scenario manager that allows you to accomplish what is analyzing data at the touch of a button. You can control your user data and permissions. Link: <http://www.azquo.com/> 16) Spread Spread is a spreadsheet solution for JavaScript platform and .NET. This tool includes more than 450 formulas. It is one of the best programs like Excel that allows you to customize data entry forms. Features: Provides API for input forms, dashboard, and graphics applications. You can optimize the size and speed of your application using a modular framework. It gives free extensibility and customization of code. You can group, sort, and filter numeric data. This tool offers hassle-free data binding. Link: <https://www.grapacity.com/Spread17> Gnumeric Gnumeric is an open source tool that is part of the free GNOME application software desktop software project. This open source excel alternative tool allows you to import data into various file formats such as HTML, Lotus 1-2-3, LaTeX and CSV. Characteristics: Helps you organize numeric value into rows and columns. You can perform and update complex calculations by defining and modifying steps later. Gnumeric allows you to create and display graphical data charts using bar chart charts and pie charts. You can perform any task involving dates, times, names, or numbers. Link: <http://www.gnumeric.org/download.html> FAQ: What is Excel Software? Microsoft Excel is spreadsheet software included in the Microsoft Office suite.
