Hey, someone can go to [settings] and check the name of this menu: [the main screen and background] or [the main screen and bearing on the lock screen]? I found this difference when searching on YouTube. On the phones of everyone else there is an inscription [the main screen and background], but only on my phone is registration [the main screen and charger on the lock screen]. It seems that in my version there is no function in which the application symbol is hidden on the main screen during installation. At first I thought that mine could not be the last version, but when I checked it twice, it was updated. I don't know what is happening, can anyone advise? The main screen and the background, which was written on mine. Make sure you are using the latest software. Color OS 7.1 Hey, someone can go to [settings] and check the name of this menu: [main screen and von] or [main screen and warehouse on the lock screen]? I found this difference when searching on YouTube. On the phones of everyone else there is an inscription [the main screen and background], but only on my phone is registration [the main screen and charger on the lock screen]. It seems that in my version there is no function in which the application symbol is hidden on the main screen during installation. At first I thought that mine could not be the last version, but when I checked it twice, it was updated. I don't know what is happening, can anyone advise? Do you have a Chinese version (PDDEM30)? You can get a screen magazine on the stairs in the Chinese version, but you can activate / deactivate during the configuration.

This is called the Lehua lock screen. I did not think that it was available in the global version. Recently, the LEHUA lock screen has adapted a number of accurate multimedia content based on the positioning of the Brand Realme mobile phone. Based on the advantages of the Lehua blocking screen in youth content, select many content categories for Realme, such as boys, cool, celebrities, photography, travel, fashion, etc.Realme user screen. Collaborate with Realme to create new green content. Lehua lock screen customized green content for realme and provided great dare to release experience. As a new brand, Realme has rapidly expanded the global market after its establishment and has grown with new people. And to encourage young people to break the shackles and create more surprises and opportunities with a "Dare to Jump" attitude. Realme's branding tone matches the music lock screen popular among young people. For this, Lehua Lock Screen selects multiple content categories such as new, cool, celebrity, photo, travel, fashion and 200+ content producers, bringing a new front-screen experience to Realme users. Including celebrity magazines such as Bazaar, Mr. Moda, Mr. Esquire, Bazaar Men, Men's Wear, etc., and travel content such as Star Travel, Galaxy Tourism Bureau, National Geographic, etc., and Lian Huaiwei, famous people such as Sheng Yitun, Ma Bogan, Wang Chenyi, UNINE, Guan Qu, Yangji YoungG, Gao Jialang and other famous stars. Le Swipe Lock Screen adapts green content to Realme, which allows Realme users not only to experience external hardware jumping, but also to enjoy their visual jumping content when the screen lights up and swipe. Step by step perspective on lock screen contents: Instead of satisfying youth, it is better to become young. Currently, many brands on the market are trying to "rebrand", but in reality they can be new. There are few brands that the group likes. The Lehua lock screen team used a unique perspective to innovate the operation and maintenance method, believing that "it is better to grow young than to please the young", thus formulating content formats and product types and successfully launching the series . from the younger onesIn 2019, the Lehua Lock screen offered a young pro IP, which included many content activities such as "Full Score Youth", "New Youth" and "Youth Exploration".

"In Search of the Wolf", an adventure reality TV show created by Lehua Lock Screen and China Geography, is the theme of young activity "Explore young people". The operations and content were influenced by Youku, Kuran, B. With the approval and support of more platforms such as the station, the total volume of transmissions of all channels exceeded 35.22 million. The captivating results of wolf search have meant that the Lehua lock screen successfully attracts the attention of content and content platform producers. With this wave of activity, the Lehua lock screen does not only provide new high-quality content users, but also provides a progressive "preferential route" for content producers and content platforms, guaranteeing coverage high, short connections and high content distribution. In addition to the activities of the Youth series, Lehua Lock Screen also launched the series of activities "I want to be on the coverage - looking for new faces in the city" at the end of 2019, so that attitude and The vitality of young people are a unique display platform. In this event, Xu Rohan, the champion chosen by the interested party, also appeared successfully on the cover of the fashion magazine "Ellemen" and was officially published in 2020. March remains that in 2020, the lock screen De Lehua further deepens the new content ecology and will continue to help content producers and content platforms to promote the creation and distribution of value content. A few days ago, Lehua Lock Screen launched a series of Young Pro IP 2020 activities. For example, on the occasion of World Migratory Bird Day, explore Youth published a heating poster for the second season. The theme is set to "Flying Birds" and will continue to work with the geography of China. Collaborate to create adventurous microbes showsand recipients of valuable content; The second season of the full result began to prepare and focus on the youth hobby and introduce a short video content. The new season "I want to be on the cover" should also appear in the third 2020. quarter. Realme still develops the touch of ground level, which is used by a large consumer base. Regular FAK research. Many functions full of realme UI 2.0 are gradually on many devices that attract a lot of attention. From the most frequently asked questions to the importance of each function in the future - all this is FAK. In the interaction between FAU this week, in addition to the reality of the UI 2.0 restaurant model, Realme talks about frequent doubts about the update of Realme UI 2.0. Realme UI 2.0 Customs, starting with many customs supplies with Realme UI 2.0. K. Can you choose the setting to change the Kingdom of colors UI 2.0? No less set setting, but when choosing an exact gradient and shadow. And if not, will this function add in the future? A - Realme UI 2.0 supports combinations of colors 5 and 10 basic colors - but currently there is no plan to choose the exact color gradient, because we still need to ensure visibility. CL Can you configure the shape of the Realme UI 2.0 folder? No, such a function has not yet been achieved. We will consider it. In the reality user interface, you can choose the speed of the program animation. Which speed setting is best for the battery? A- The sooner, the better. The reason is that the animation usually reloads the central processor. So earlier the gadget opens, the shorter the animation, the less battery it is used. Realme UI 2.0 The demand for new functions always captivates consumers, but some of them question the real function of these functions UI 2.0. Perem answered these questions:Question: Does the kingdom pay for NFC? What are the benefits of using the Kingdom Paya compared to Google Pay? A: Realme Paya can work without NFC. And compared to other payment applications, such as Google Pay, it offers a number of unique services, including finance, management, insurance, tickets and hotels. Question - What is the difference between smart driving and driving in smart services? A-Smart Driving Activates Bluetooth smartphone to connect to a car set and drive all incoming messages using car speakers. On the other hand, the driving mode does not turn on your Bluetooth and off only all the alarms except incoming calls, unless you drive and write what can be dangerous. Both modes can be added to quick settings for easy access. Question: I noticed the Luhu screen feature in the RealMe 2.0 user interface. How is it different from the previous lock screen protocol? A- This is the same function but was immediately renamed. We are currently considering other naming opportunities. Wealme also talks about the camera feature series Realme 8, not available on other devices with Realme UI 2.0. Question: Will Tilt-Shift Realme 8 series scan the previous smartphone kingdom with an update? The answer - no, this is not planned at the moment, as several hardware components, from the lens to the silicone specifications, and the company also took over and solved a number of different problems. Question: I accidentally deleted Vocvault, can I recover it? A- Realme UI 2.0, you can easily reinstall system application settings> Application Management> Restore deleted system applications. Displays a list of all system applications that are not installed and downloaded again with a simple touch. Q: If you want more privacy, is there any way to hide the system cloner in your phone settings? A- yes, realme ult lets you hide the system clone in the settings, so when someone uses your phone, they won't know you have another personal space. Just go to settings > privacy > system cloner > hide access to system clone this time is discussed a lot. Such sessions become important for the communication channel to be clear between the company and the users. This month will be followed by an episode of Askmadhav, in which the executive director himself will answer some questions related to the functions of Realme's UI and upcoming plans. As stable Android 11 updates are prepared for different devices, Realme Android 11 update tracker becomes

an important item for your subscription.
