But how do you know if your number is blocked by someone else? If you can't reach a person, it allows you to quickly check if you have a few blacklist suggestions. Telephone advertising services, people who can be recalled or former people who enter without permission, several factors can justify blocking. This is done very easily from your smartphone. The easiest way to block number one on Android or number one on iPhone. And since this movement is not in the monopoly of anyone, your number can also enter someone else's blacklist. Know your numberIt was prohibited, it is actually quite simple. You just have to understand how it works when someone blocked your phone number. After one or two signals, you will be automatically redirected to the vote. The correspondent, in turn, does not receive a waiting connection. His phone does not call. If you leave a voice message, SMS will not get contact. The message automatically goes into the folder of blocked messages in iOS. However, if the interlocutor uses a smartphone with Android, he will receive a vocal message as a SMS anxiety if the function is activated by the operator. A reliable statement whether anyone has blocked your number is not specific. The same observation can be done, for example, in case of network instability. That is why it is important to try again or twice, with several minutes. If the connection is still redirected after one or two sound signals, the confirmation step is to try to connect to another number or make a connection using a hidden number. Select #31 #, and then the second number number. If the phone calls, I am almost sure that your number was blocked. What happens to text messages if you block the number, you cannot receive calls or text messages from it. Thus, the same rule applies to information. If your number is blocked by contact, it will not receive your SMS, even if everything at your level looks like if the messages were successfully delivered. In fact, nothing unusual happens. But do not make a mistake, the recipient will never receive them while your number is on the black list. Finally, do not overdo it, causing hidden numbers. Most people do not react to this, and if they continue, legal consequences may occur, because they can mean persecution. Operators can reveal the identity of the calling subscriber in case of complaints. On the same topic, we invite you to read our article to find out if someone has blocked you on WhatsApp. The application will not tell you formally, but thanks to the instructions you can find out. Safety.
