View all 2 photosAug 2, 1997 It's like a paper clip. This collection idea, called the Silverado Superwide, is as clever and exquisitely simple as that folded piece of shiny wire. Move the rear wheels out of the bed and get rid of those pesky interior wells that intrude on the box volume and loading comfort. The bright red truck looks like any C-series extended-cab pickup with a 6.5-foot bed, a dualie rear axle, and great looking alloys. (The grip position of the shaft is the result of a 3-inch height reduction achieved with custom springs.) Behind the wheel with the V-8 acceleration of 5.7 liters of bone, it gets strong, as evidenced by the brief 8.4 seconds it took to reach 60 mph. On the road, the

widest track seemed to actually provide a little more sturdy stability. Hardly anyone noticed when we stopped to ask the general contractor in a building if we could take some pictures at the time of quitting. He made a decision that he might have regretted, because when the truck door fell, the work ground stopped. And soon a crowd of carpenters and other traders gathered to look out at Superwide's bed as the first explorers on the edge of the Grand Canyon. The workers then clung to know how soon Chevy was intending to offer this really difficult truck. They fell as reverentially calm as people in an E.F. Hutton commercial to hear the answer. But Chevy's friendly representative wouldn't talk. "It's just a concept", he said. Actually, if this larger-capacity arrangement is not offered in the new '99 C/K, it will not be because it is not cheap and easy to throw away. Chevy's Moss says that all it took was a few relatively simple steps, like flipping the standard spring mounts and the shocks on the outside of the frame rails. The end chassis was bolted on a 9.5-inch sturdy rear axle with longer tubes and axis. This moved the unit wheel from each side out about 5 inches. Even so, with the execution of the Sportside Flandersity, the overall width remains a reasonable maneuver 90 inches wide, 4 inches narrower than a true duality. Moss says the 78-inch long, 65-inch wide, 19-inch high special bed could be created simply by not cutting the wells in the normal soil sampling process. In this case, however, the parts had to be added back into a standard production bed. Here you wait. Chevy decides to run the paper clip of collecting ideas. But you don't want to pay the full price for a new brand. You need a used one that is for sale by the owner. Here are some tips for buying a used RV from an owner. Knowing what you're looking for Before you start looking for a used VR, it's important to know what sizes and makes of RV you are willing to consider. Make sure what you are willing to spend and what are your limits. Think about what your needs are, and whether you will use a VR for short trips or longer trips. Talk to your friends about their experiences with RVs, and peruse forums to read about the experiences of other owners. You can even download worksheets that help you prepare for your used RV search. When it comes to online searches, you have many choices. You can find websites dedicated to RV sales by owner, and you can discover great deals. It's easy, your search for online advertisements and sales websites, but you should also think about looking in person. Drive through your city and cities near where you live. It can even be worth your time to go to nearby campsites. You may be surprised by the offers you can find only when driving. Some more research you have found in the RV (or RVs) that might be interested in buying, doing some research. Look for the fair market value for RVs of the same brand, year and condition. Find out what other similar VRs are selling in and around your area. For a fee, you can even find out the story you're looking at. This report may include the history of the owner, as well as accidents or damage. Considering the future maintenance of the most important considerations when you are looking at a used VR of a owner is future maintenance. The costs of repairs and preventive maintenance can consume your budget, especially if you are interested in an older RV. Carefully inspect the VR before committing to buy it. The last thing you want to do is buy a VR that becomes a money pit. Do not be afraid to ask questions about the best things you can do in your search for a used VR is to ask questions. You should ask about the repair and property history of the VR, and be not afraid to request maintenance records and warranty information. If you test the VR drive, take the owner with you so you can ask questions as you drive. No question is too big or too small, so feel free to ask the landlord about everything that bothers you or worries you. More information about questionnaireSwered.net QuestionsSwered.net
