How to disable your windows key

Greg Mombert / Digital Trendsenly This year many Windows 10 users have been alarmed to see that the ads were sticking on their locks screens in which no ad had been before. They were nice, ads of Screensaver-like for Windows ¢ or Xbox games, but still ads. Not surprisingly, people immediately called a way to make them stop. Yes, there is a solution to pass those ads on Windows 10, but you will have to visit your settings. We will explain what is happening here, and we guide you through the fastest solution. Spotlight on Windows Announcements that the advertisement of the lock screen you are looking to get rid of it is part of an initiative called Windows Spotlight, which is all about customizing the lock screen. When your computer goes to sleep or is temporarily deactivated, it comes into the lock mode Ã ¢ â,¬ "this is the security setting that requires you to insert biometrics or passcode to access Windows 10. The lock screen himself is good and keeps people from laughing your data easily, but transforming it into an advertising billboard after Windows 10 has already been released is annoying for some users. Now, buying things about the Windows store is a 'Full discussion (reddit is not a fan of getting video games there), but these ads are presenting for everyone, even those who are never going to buy. If you fall into this last category, it's time to show you How to change these ads and replace them with an alternative. How to turn on the ads, there are two important steps to turn off the ads of Spotlight on Windows 10 and you have to do it in the right order to complete the process. Step 1: it is necessary Rio Modify what the lock screen shows you. Start accessing Windows 10 and going to the Start menu. Here, click the gear icon for settings. If you are having trouble finding the settings, you can type Ã ¢ â,¬ â "SettingsÃ ¢ â,¬ in the Cortana search bar and should bring the right tool to use. Once in the settings, look for the monitor screen icon that says the customization and select it. This will open a different window with a sidebar that will include several options to change how Windows 10 seems and works. In the sidebar, choose the option that says the lock screen. This will show you what your lock screen is giving you more background choices. At this time your screen is set to Windows Spotlight. Other options include images and presentations. Choose another of these to free up the reduction of current ads on Windows 10. Don't worry if you don't have any image to use for the screen, Windows 10 comes with different preloaded image options to choose from if necessary. Step 2: You're not finished yet! You still need to keep the spotlight to turn it back on in the future. Now that you have chosen images or slideshows instead of reflectors, you will see different thumbnails of different popular images you can use, an option to search for more image options, and then a small section under this that says, Ã ¢ â,¬ "facts, Tips, tricks and more on the lock screen. You can activate or deactivate this option. Switch to turn off so that the bar is white instead of blue! Otherwise, the next time Microsoft has an ad that want to kick, they turn on again The reflector again. Turning off this prevent this type of recurrence. Turn off the suggested apps, even now the next time Microsoft has a video game or an app to push your way, you won't see it. However, since we are in Material to stop Windows 10 ads, let's talk about another intrusive advertising section that you can face simultaneously: Start menus. Yes, if you spent time in the Start menu, we note the suggested apps, which are basically only promotional content for things you don't have, but that Microsoft wants to buy. This can become frustrating, especially if you presume you have an app that is just an advertisement! Fortunately, there is a simple way to get rid of these too. If you are still in the screen, just click Start. The first option will start offering Ã ¢ â ¬ Ã ¢ Ã ¢ â ¬ "The suggestions show tooltips" is probably turned on. Turn it off Ã ¢ ¬ "and you're done! Note that you can also click with the right mouse button on any of these suggestions at any time and choose to turn them off all, if this option ends up being faster for you . the recommendations of the editors hitting the Windows key on the keyboard to the case can be very annoying. sometimes, it hits you a full screen game by opening the Start menu or inadvertently launches a shortcut. Fortunately, there's a way to disable the key on your Windows 10 computer. Here's how. the easiest way to disable the Windows key is using the utility FREE Free Microsoft PowerToys. PowerToys With, you can reassign any key to have the function of any other. In this case, we camberemo the Windows key to be Ã ¢ â,¬Å uncefined, Ã ¢ ¬ "which means it will not happen anything when you press it. To disable the Windows key, Microsoft Powertoys download if you have not already installed. Start PowerToys and click Ã ¢ â,¬Å Keyboard managerÃ ¢ â ¬ in the sidebar, then click Ã ¢ â,¬Å Remap to key.Ã ¢ â ¬ in the "Keyboard Keypad" , click the Ã ¢ â £ Ã ¢ œ Ã ¢ ¬ "sign button to add a definition mapping. to change a key mapping, you select the button you want to edit in the left column, define what you want to do in the right column. Using the drop down menu under the Ã ¢ â,¬Å Key: Ã ¢ ¬ "tester left, select Ã ¢ â,¬Å win.Ã ¢ â ¬ in section "mapped in the right section, click the drop-down menu and select Ã ¢ â,¬Å Comefined.Ã ¢ â ¬ Click Ã ¢ â,¬Å Ok, Ã ¢ ¬ and Windows avverterai than you can be able to use Windows because © button will not be assigned. Click Ã ¢ â,¬Å continuous comunque.Ã â ¬ © DopodichÃ, the Windows button should be disabled. your settings have been saved, and six free to close PowerToys and use your computer as usual. Unlike other ways to remap the keys SharpKeys and how to use the Windows registry, you do not log off or reboot to take effect. The Windows key will be disabled immediately. As rievilire the Windows key If you change your mind and want to reactivate the Windows button, start PowerToys and access Keyboard Manager> Remap a key. Locate the Ã ¢ â,¬Å win Ã ¢ ¬ "> undefined mapping and click the trash nearby to delete. Then click Ã ¢ â,¬Å Oka ¢ â ¬ close the window. DopodichÃ ©, the key of Windows will work normally. Related: how to make your the sliding block by block useful on a Windows 10 PC tired of Windows 10 that annoys you with Ã ¢ â,¬Å get even more out of the Splash screen WindowsÃ ¢ â ¬ every time you update? it may be helpful to some, but also intrudes in the middle. Here's how to turn it off. First, open Ã ¢ â,¬Å settingsÃ ¢ â ¬ clicking by clicking on the menu Ã ¢ â,¬Å starta ¢ â ¬ and selecting the small gear icon (or you can press Windows + I on your keyboard.) In Ã ¢ â,¬Å settings, Ã ¢ Click â ¬ Ã ¢ â,¬Å system.A ¢ â ¬ â Ã Ã "system, Ã ¢ ¬" Select Ã ¢ â,¬Å Notifications and actions "in the sidebar. on Ã ¢ â,¬Å Notifications & Actions Ã © screen, deselect the Ã ¢ â,¬Å s suggest ways that I can finish my device configuration to get the most out of box WindowsÃ ¢ â ¬. If you like to prevent another pop-up window after an upgrade - one that suggests "such as what new tips - can also uncheck the box next to me so welcome experience after Windows updates and occasionally when I log in highlight new and what are suggested. Ã "When you're done, close Ã ¢ â,¬Å settings.Ã â ¬ © DopodichÃ, the next time you update, you won" See the Ã ¢ â,¬Å get most of the screen ". It's a less thing to get between you and a more simplified Windows 10 experience. Happy computing! Informatica!
