They are optional. Optional materials include: Graduated cylinders, beakers, test tubes, test tubes, test pipe rack, food coloring, wate children love to mix colors together to see which new color can create. This package is all about mixing colors to create new ones, know the primary and secondary colors and practice to read and write words in color. This post contains affiliate links to your convenience. Color mixing of work sheets color puzzle color color color word writing practical color for color color words color color page color color colors and write pages give children the possibility of practicing the recognition of the word color, write and color a specific object. Children love color with numbers. The mermaid coloring page is a rainbow of fun when they end up coloring all the different bubbles. My youngest enjoyed the coloring page of the word of color. It helps them recognize words in color as they color every word color the right color. There are two graphs to help with color recognition. These posters are fun and can be viewed on the wall for a quick reminder for children or a colored display. I had to include puzzles. I said it quite often but the puzzles are our activity Absolute. These puzzles were the main idea for this package and everything else deriving from them. There are four in total. Each puzzle has three pieces. The big piece is the color that the two smaller pieces are mixed to create. I would suggest to laminate these to make them touch friendly. The document also seems to roll after frequent use. Take the paints or nugs for the paint for this fun working page. Put a paint coffee table in the circle that corresponds to the color declared. So use their finger or brush for children, children call colors together to see what happens! This was so funny that even bigger children wanted On it.â, the last mention page is the color and track worksheet. Very similar to the previous page this is about mixing colors. However, they can use pastels, markers, glue or strips, even colored paper to this if you want to change things a little. They will make the white circle above the word corresponds to the word below. Then you trace / write the word color. This package is a fun way to introduce mixing color to show how colors can be mixed to create new colors or as a way to recognize practical color words. Children will have fun playing in the paint while learning about every color. For more fun than color, please consult our series colors I know that mine, where you will find a greater deepening of the different colors. Click here to download the bisex color Becca activity package from Masterminds Miniatura: I am a 3 Mother Homeschooling that loves to be creative. Miniature Masterminds is the blog where I share my knowledge for years of education lessons of the early childhood and the experience passed to work with children in class, as well as being my creative outlet so much needed. I like to share free printable activities, crafts, and ideas to help others in their work with young children. Miniature Masterminds also showcases the activities I do with my daughter in preschool age, elementary school son, and the middle school daughter in our home education trip.
