This post will provide you with a continually updated list of the Best APKs for Movies and TV Shows. APKs or Android Applications come in all shapes and sizes and are available for download on nearly every streaming device. The most popular streaming device on the market today is the Amazon Firestick. Due to its low price point and sideloading abilities, the Firestick is used by millions for all streaming capabilities. Stream Faster & Anonymously One of the main reasons users purchase this device is because of its 'jailbreak' ability. While this term is often used to describe the process, this is not what actually occurs. By Jailbreaking a Firestick, users can install 3rd party apps not available within the Amazon App Store. Oftentimes, these apps are used to stream Movies, TV Shows, Live TV, and much more. If you would like to Jailbreak a Firestick, I suggest my step-by-step process which has been used by millions. How To Jailbreak a Firestick If you own the new Chromecast with Google TV device, we recommend our guide below: How to Jailbreak Chromecast with Google TV Many of the APKs in the following list are available for installation on a jailbroken Firestick or any preferred streaming device. When paired with Real-Debrid, most of the APKs on this list will help Stop Firestick Buffering. See further down for more information on Real-Debrid. These are the best APKs for streaming Movies and TV Shows and this list will stay constantly updated for your enjoyment. Simply search the Google Play store for Kodi and click the install button. You can then install the best Kodi Add-ons with the click of a button by using my free TROYPOINT Supercharge Kodi Guide. See our list of Best Free TV Apps for even more streaming options! Don't Get Clipped! Most cord-cutters use IPVanish VPN and rightfully so. The free streaming applications, add-ons, and paid IPTV services are usually hosted on insecure servers. These shady outfits log everything that you access through their app or service. Without IPVanish, your IP Address is being logged along with everything that you access through it. Your IP Address points back to your location and identity which compromises both your privacy and security. Your current identifying IP Address is 183.83.211.175 When you use IPVanish VPN, your IP address is masked and converted into an anonymous one. IPVanish VPN will provide you with an anonymous connection to the Internet. This will prevent your Internet Service Provider, app/add-on developers, government agencies, and other 3rd parties from logging what you're accessing online.
