With a constant stream of fantastic updates and hundreds of iconic creatures to capture, the revolutionary shot of Niantic revolutionary is just improving. I played this game for over 2 years and I can tell you that this is the best game PokÁf Á © Mon you can get on your phone or mobile device. I know some people I disagree with me and say the problems of play or delays but when you think that every game the face and the fun you can have while you play this game in this game, its little glitches. If you do not agree with me, look at all those who rated this 5-star game. I told all those I know about PokÁ © n Go and everyone says the same thing as the best game ever. If I can recommend something to developers, it would be to add a John / Team Go rocket search task, insert the master ball and you can get it from achieving special search tasks and the last thing is to solve the Internet / week problem Connection that you see that I can be in my room with complete bars and in a center of a battle my GAL.S game and tell the weekly connection and end up losing idk if you can solve it, but I wanted to mention it. The next and last thing is that my brother has found a way to cheat the system if you enter the battery saver mode and the sinc adventure can put you the In a (large) sock and shake him up and down and will wear it as steps and miles using these methods to open eggs and get Buddy candy. I wanted to tell you this because I consider it cheating and I want to repair it if you can do it. This app is an incredible app! It's an extraordinary way to kill time and a big app to get your exercise! There are a couple of things that I think could be better. I feel that it should be a chat space! So so You can talk to the people with whom you are a friend to meet and make incursions or fight together. Instead of having to download an app that you also need to know at least the phone number. I feel you should be able to get more than 50 coins a day. Or at least be able to get a bonus for every day you continue your PokÁ © Mon is in the gym. Saying that I know the prices to buy stuff is set to match the quantity of coins able to be received every day. So if necessary, I feel that it would be OK to increase the price on the coins a little. For trading I feel you should be able to choose what you get your friend. Or at least be able to put something inside for them as well as an adhesive. This also adds the fact that we need a chat system among friends to be able to say what one another needs and or is getting. I know you have notifications for what your friend has received, but it would still be nice to say Á ¢ ¢.~ "thanks for the dude ball pallet * or something on the liner of that. Overall this game is incredible! And the I take more times a day. But I'm sure other people have said things along the lines of what I said! I mean nothing of all this is not a rude way, but I think these things should be changed or added to the game!
